Ideation Phase
Brainstorm & Idea Prioritization Template

Date	28 September 2026
Team ID	6ab221d587602313e82c60c9
Project Name	Import data using transform maps (spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team gathering	Team members meet (online or offline) to discuss the difficulties faced while importing spreadsheet data, and agree on one problem to solve.
Problem statement	Entering spreadsheet (Excel/CSV) data manually into tables is slow and error-prone. How can we import spreadsheet data accurately and automatically into the target table by mapping its columns to table fields using transform maps?
How might we	How might we load spreadsheet data through an import set and transform map in less time and without errors?

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm: each team member writes down ideas for the problem statement.

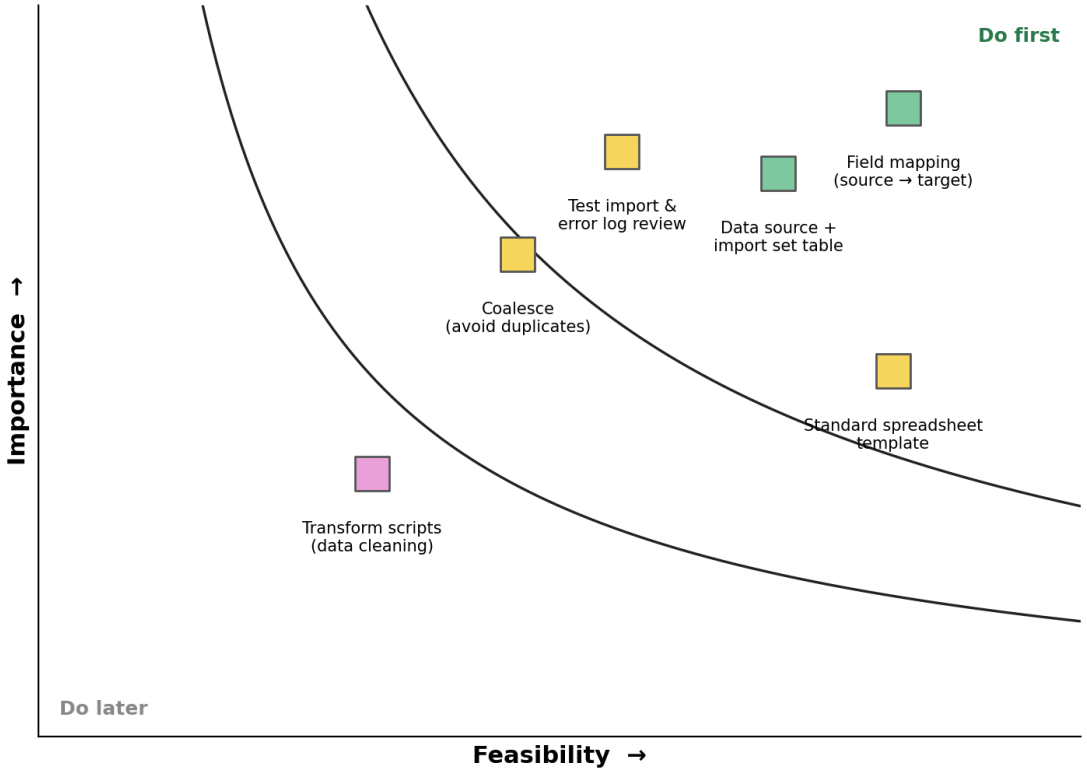

Member 1	Member 2	Member 3	Member 4
Upload the Excel file as a data source	Create field maps: source column → target field	Clean data with onBefore/onAfter transform scripts	Review import log and error rows, then fix them
Create an import set table from the file	Use Coalesce to avoid duplicate records	Run a test import with sample data first	Make a standard spreadsheet template for the team

Group ideas: similar ideas are clustered together and given a name.

Group 1: Data Preparation	Group 2: Mapping & Transformation	Group 3: Testing & Monitoring
Standard spreadsheet template	Data source & import set table	Test import with sample data
Data format validation	Field maps (transform map)	Import log review
Duplicate check	Transform scripts, Coalesce	Fix failed records

Step-3: Idea Prioritization

Ideas are placed on the grid by Importance and Feasibility. Ideas in the top-right corner are the ones to take forward.

Selected ideas:

Data source and import set table setup, field mapping through the transform map, and Coalesce for duplicate handling.
