| Project Name | Project - Import Data using Transform Maps (Spreadsheet) |
| Maximum Marks | |

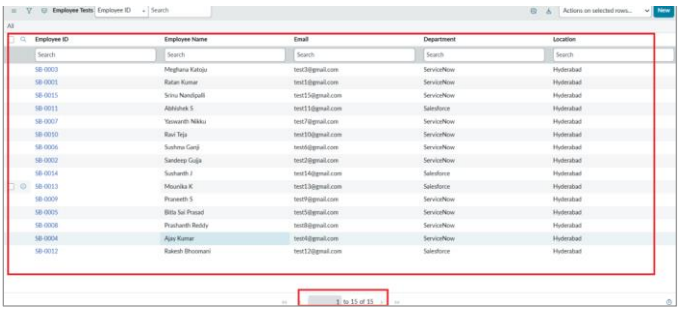

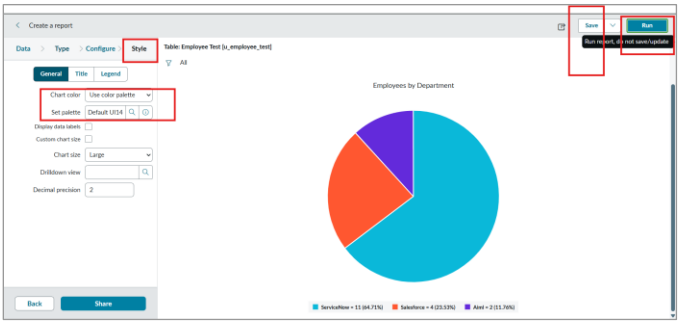

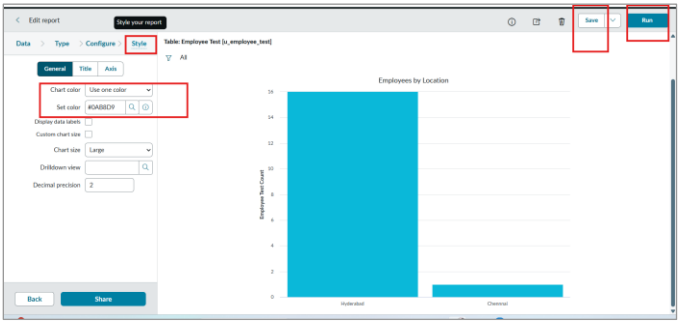

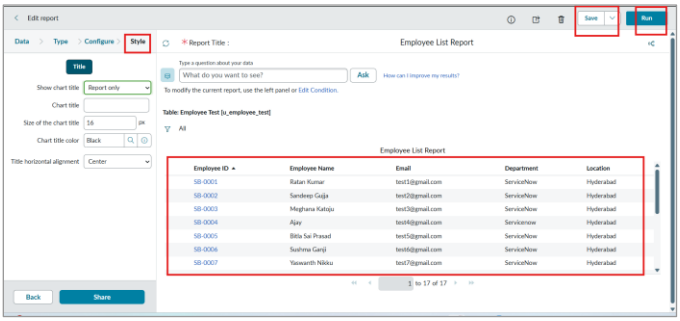

**Model Performance Testing:**

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter | Screenshot / Values |
|---|---|---|
| 1. | Data Rendered | Employee data received as a spreadsheet (.xlsx/.csv) was uploaded into ServiceNow via System Import Sets > Load Data, creating a staging (import set) table.<br>[Screenshot: Load Data page and imported rows in the staging table]<br>  <br><br>*Application Navigator → System Import Sets → Load Data*<br>  <br><br>*Load Data form: Employee Import table, spreadsheetproject.xlsx*<br>  <br><br>*Data loaded into staging table: Complete – Processed 4, errors 0* |

| | | |
|---|---|---|
| 2. | Data Preprocessing | Spreadsheet columns were checked for blanks, duplicates and format issues before loading; the import set rows were reviewed and column-to-field mappings were prepared in the Transform Map.<br>[Screenshot: Import Set rows / Table Transform Map field mappings]<br>  <br>*Source spreadsheet data (Employee ID, Name, Email, Department, Location)*<br>  <br>*Table Transform Map: Employee Import → Employee Test*<br>  <br>*Field mappings: source fields to target fields* |
| 3. | Utilization of Data Filters | Coalesce on a unique field (e.g. Employee ID / Email) was used to avoid duplicate records, and a Transform Map script / field map conditions were used to skip invalid rows.<br>[Screenshot: Coalesce setting and Transform Map script]<br>  <br>*Coalesce = true on Employee ID field map* |

| | | |
|---|---|---|
| | |  <br>*Re-import of same data: Inserts 0, Updates 0, Ignored 4 (no duplicates)* |
| 4. | DAX Queries Used | Not applicable – ServiceNow Transform Maps were used instead of DAX. Field maps and Transform Scripts (onBefore) handled data conversion.<br>[Screenshot: Transform Map field maps / scripts]<br>  <br>*Mapping Assist: Source vs Target fields*<br>  <br>*Transform Map field maps* |
| 5. | Dashboard design | No of Visualizations / Graphs -<br>[Screenshot: Transform history / target table list view showing imported records]<br>  <br>*Employee Analytics Dashboard with 3 report widgets*<br>  <br>*Transform History: Total 4, Inserts 2, Updates 2* |

| | | |
|---|---|---|
| | |  <br>*Employee Test table list view showing imported records* |
| 6. | Report Design | No of Visualizations / Graphs -<br>[Screenshot: Report of imported records in the target table]<br>  <br>*Report 1 – Employees by Department (Pie chart)*<br>  <br>*Report 2 – Employees by Location (Bar chart)*<br>  <br>*Report 3 – Employee List Report (List)* |
