Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	[Maximum Marks]

Project Overview:

Project Name: Import Data using Transform Maps (Spreadsheet)

Project Description: This project imports structured employee data from an external spreadsheet into the ServiceNow platform using Data Sources, Import Sets and Transform Maps, so bulk data can be loaded, mapped, cleaned and verified without manual entry.

Project Version: 1.0

Testing Period: 25 October 2026 to 28 October 2026

Testing Scope:

Features and functionalities to be tested: Data Source creation, spreadsheet loading into the Import Set table, Transform Map creation and field mapping, Coalesce, field transform scripts, handling of invalid rows, Transform History review.

User stories / requirements to be tested: USN1 to USN11 (Sprint 1 and Sprint 2).

Testing Environment:

URL/Location: ServiceNow Personal Developer Instance (https://<instance-name>.service-now.com)

Credentials (if required): [Username/Password]

Test Cases:

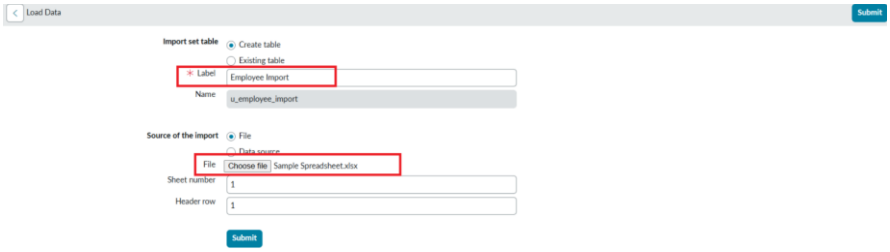

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create Data Source for the employee spreadsheet	1. Open System Import Sets > Administration > Data Sources 2. Click New, choose type File and format Excel 3. Enter name and save	Data Source is created and saved successfully	Data Source created and saved successfully	Pass
TC-002	Load spreadsheet data into Import Set table	1. Attach the employee .xlsx file to the Data Source 2. Click Load All Records 3. Open the Import Set table	All rows from the spreadsheet appear in the staging table	All rows appeared in the staging table	Pass
TC-003	Create Transform Map and map fields	1. Open Transform Maps and click New 2. Select source Import Set table and target table 3. Use Auto Map Matching Fields, then map remaining fields manually	Transform Map is saved with all source fields mapped to target fields	Transform Map saved with all fields mapped	Pass
TC-004	Run transform with valid data	1. Open the Transform Map 2. Click Transform 3. Open the target table	Valid records are inserted into the target table	Valid records inserted into the target table	Pass
TC-005	Coalesce on unique field (duplicate check)	1. Run the transform again with the same spreadsheet 2. Check the target table record count	Existing records are updated; no duplicate records are created	Records updated; no duplicates created	Pass
TC-006	Field transform script formats data	1. Add a field transform script to format the name/email value 2. Run the transform 3. Check the formatted field in the target table	Values are stored in the correct format	Values stored in the correct format	Pass
TC-007	Negative test: empty or invalid rows	1. Add rows with empty mandatory fields to the spreadsheet 2. Reload the data and run the transform	Invalid rows are skipped and not inserted into the target table	Invalid rows skipped; valid rows imported	Pass
TC-008	Review Transform History and error log	1. Open System Import Sets > Transform History 2. Open the latest run and check the counts	Inserted, updated and skipped counts are shown correctly	Inserted, updated and skipped counts shown correctly	Pass

Bug Tracking:

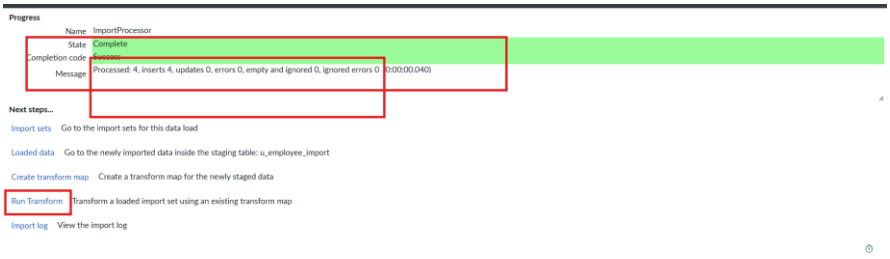

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback or comments
BG-001	Date of joining imported in the wrong format	1. Load spreadsheet with dates as DD-MM-YYYY 2. Run the transform 3. Check the date field in the target table	Medium	Closed	Fixed by adding a field transform script to convert the date format
BG-002	Duplicate records created on second import	1. Run the transform twice 2. Check the target table	High	Closed	Fixed by setting Coalesce on the unique Employee ID field

Test Case Screenshots:

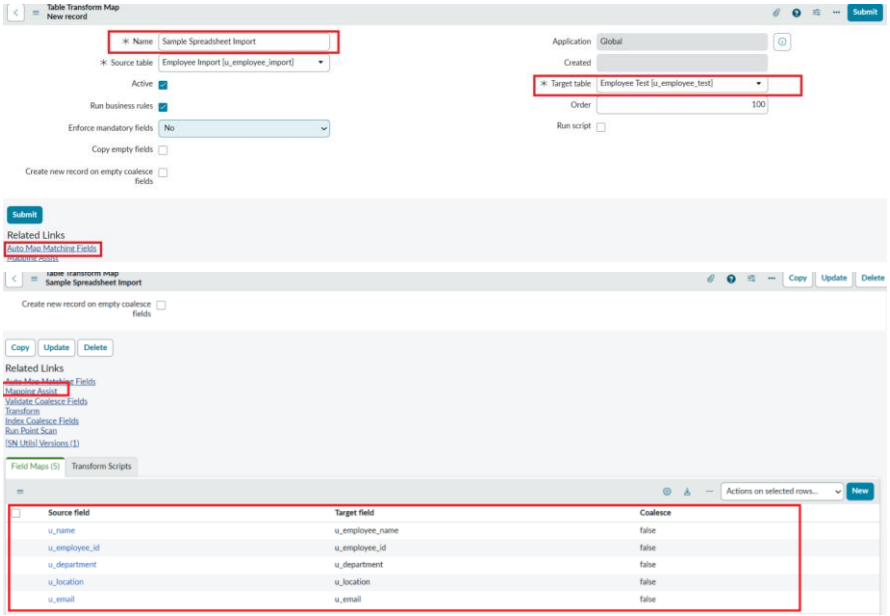

TC-001 - Create Data Source for the employee spreadsheet (Load Data / Import Set table setup)

TC-002 - Load spreadsheet data into Import Set table

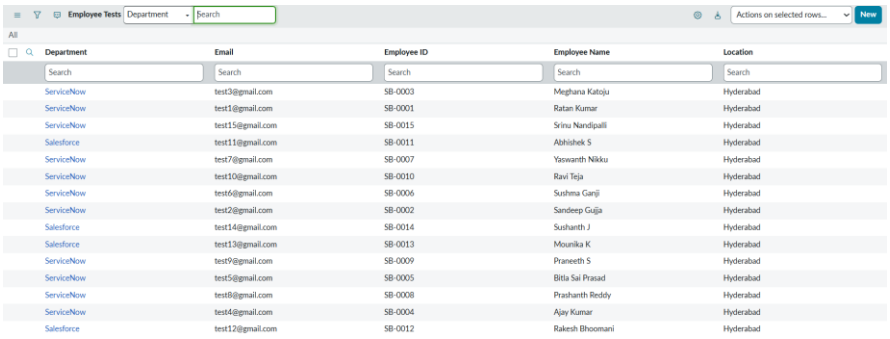

TC-003 - Create Transform Map and map fields

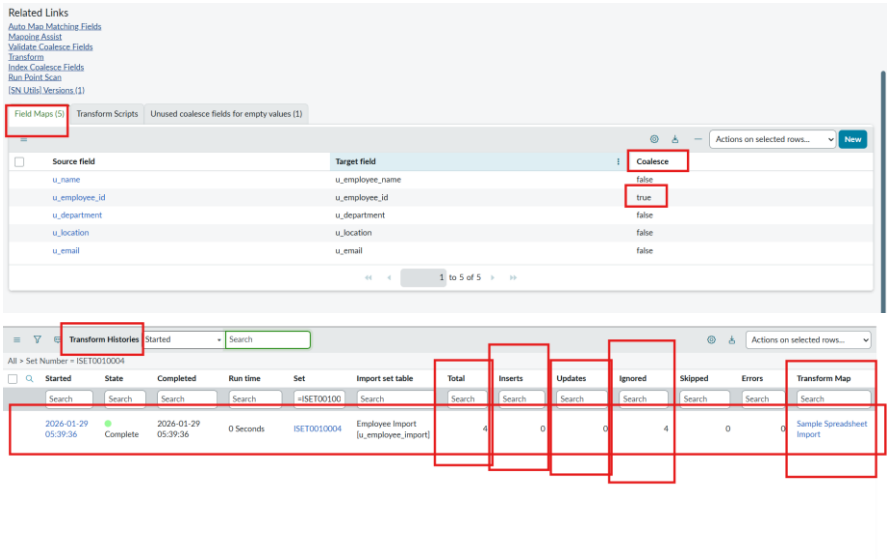

TC-004 - Run transform with valid data

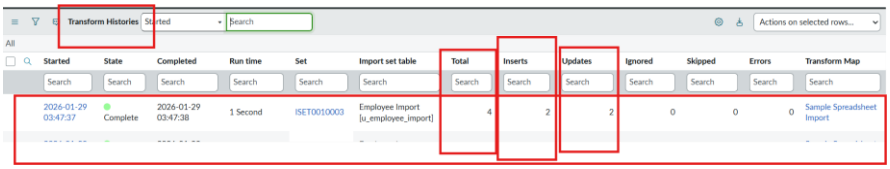

TC-005 - Coalesce on unique field (duplicate check)

TC-008 - Review Transform History and error log

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback or comments
BG-001	Date of joining imported in the wrong format	1. Load spreadsheet with dates as DD-MM-YYYY 2. Run the transform 3. Check the date field in the target table	Medium	Closed	Fixed by adding a field transform script to convert the date format
BG-002	Duplicate records created on second import	1. Run the transform twice 2. Check the target table	High	Closed	Fixed by setting Coalesce on the unique Employee ID field

Signature: [Tester's Signature]

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
