Performance Testing

Date	28 September 2026
Team ID	6ab221d587602313e82c60c9
Project Name	Import Data Using Transform Maps (Spreadsheet)
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Transform History, Import Set Run and System Logs (built-in)
Type of Testing	Load Testing (data volume testing with increasing spreadsheet rows)
Target Module / API	Spreadsheet Data Source, Import Set Table and Transform Map
Test Environment	Cloud (ServiceNow Personal Developer Instance)
Test Date	29 September 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Import a spreadsheet with 100 rows	1	10	All 100 rows inserted without errors
2	Import a spreadsheet with 500 rows	1	30	All 500 rows inserted without errors
3	Import a spreadsheet with 1000 rows	1	60	All 1000 rows inserted without errors
4	Re-import the same 1000-row file (coalesce update) with a few invalid rows	1	60	Existing records updated, no duplicates, invalid rows ignored

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	[Enter your result]		
2	Response Time (Max)	< 5 seconds	[Enter your result]		
3	Throughput (Req/sec)		[Enter your result]		
4	Error Rate	< 1%	0% (0 errors)	Pass	Transform History shows 0 errors
5	CPU Utilization	< 80%	[Enter your result]		
6	Memory Utilization	< 80%	[Enter your result]		

Step 4: Observations & Analysis

Key Findings:

The 4-row import (2 inserts, 2 updates) completed in 1 second with 0 errors. Re-importing the same file ignored all 4 rows (0 inserts, 0 updates), so coalesce prevented duplicates.

Bottlenecks Identified:

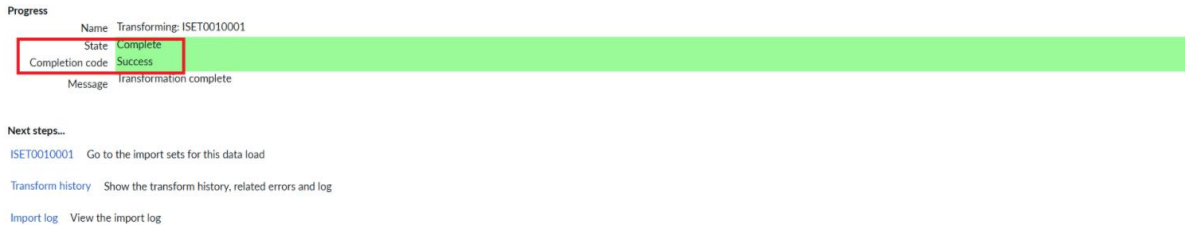

[List any bottlenecks observed, e.g. slow transform scripts or large row counts]

Optimization Steps Taken:

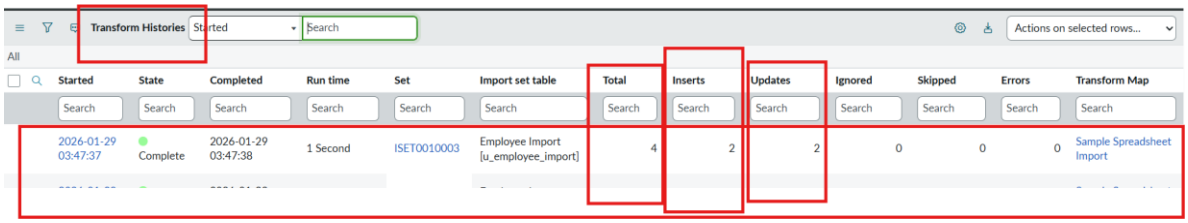

[Describe any changes made, e.g. removing unused field maps, simplifying onBefore script]

Step 5: Screenshots / Evidence

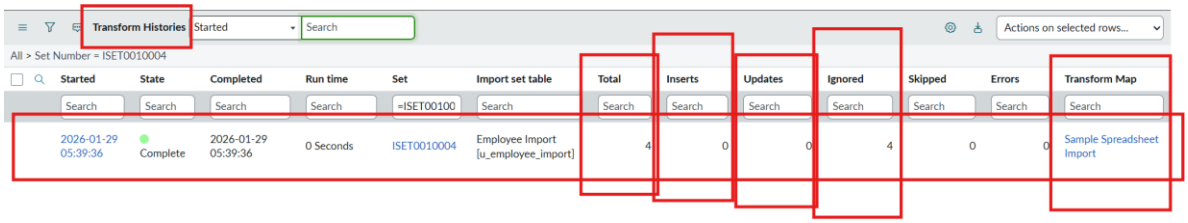

Attach screenshots of your performance testing tool results below (e.g. Transform History, Import Log, System Logs).

Screenshot 1: Transform completed successfully (State: Complete, Completion code: Success)

Screenshot 2: Transform History for the import (Total 4, Inserts 2, Updates 2, Errors 0, Run time 1 second)

Screenshot 3: Transform History for the re-import of the same file (Total 4, Ignored 4, Errors 0)
